Vaccine Services Procedure Code 90623 is Now Available Through TVFC Effective April 1, 2024

Key Details

Effective for dates of service on or after April 1, 2024, vaccine services procedure code 90623 is now available through the Texas Vaccines for Children (TVFC) program for clients who are 10 years through 18 years of age.

Note: Procedure codes for vaccines distributed by the Texas Vaccines for Children Program are processed as Informational on Texas Medicaid fee-for-service claims for clients who are 18 years of age or younger. However, these procedure codes are reported with the procedure code for the administration of the vaccine, which allows the provider to be reimbursed for the administration service.

PCHP may reprocess affected claims submitted with this procedure code and date of service on or after April 1, 2024. Providers are not required to appeal the claims unless they are denied for additional reasons after the claims reprocessing is complete. Providers may bill PCHP retroactively for procedure code 96372.

Action

PCHP will update our systems and processes to reflect code updates and will inform impacted providers in the PCHP's network about any code updates and reprocessing of claims.
